

Case Study – Managed Office Services

Managed Office Services (MSO) is a serviced office and co-working supplier in Birmingham. They were looking to create some dynamic shared working areas in under-utilised space around their stairwell and atrium. A key requirement was to create a WOW factor as people entered the building.

The Meeting Pod Co installed 2 and 4 person open meeting pods, the specialist acoustic foam provided enough noise reduction properties for private meetings, whilst creating a truly dynamic collaborative working space that has a real buzz!
