

Case Study – Bahrain Outdoor Pods

The Meeting Pod Co's first order to Bahrain in collaboration with DS Ergonomics has turned out to be an absolute stunner! We supplied 4 x 4 person open outdoor pods with special heat resistant composite resin for those hot temperatures. Each pod was supplied with composite wood effect interior, fixed tables and flooring together with solar power & lighting and LED lighting. The feedback has been amazing, with the overwhelming agreement that the design of our pods compliments perfectly a truly impressive setting!
